Help the reader understand why your research is important and what it is contributing to the field:

- Start by giving the reader a brief overview of the current state of research in your subject area.
- Progress to more detailed information on the specific topic of your research.
- End with a description of the exact question or hypothesis that your paper will address.

Also state your motivation for doing your research and what it will contribute to the field.

## **Methods**

Formulate your research question. It should include:

- A detailed description of the question.
- The methods you used to address the question.
- The definitions of any relevant terminology.
- Any equations that contributed to your work.

The methods section should be described in enough detail for someone to replicate your work.

## **Results and Discussion**

Show the results that you achieved in your work and offer an interpretation of those results. Acknowledge any limitations of your work and avoid exaggerating the importance of the results.

## **Conclusion**

Summarize your key findings. Include important conclusions that can be drawn and further implications for the field. Discuss benefits or shortcomings of your work and suggest future areas for research.

## **Acknowledgments**

You can recognize individuals who provided assistance with your work but who do not meet the definition of authorship. The acknowledgments section is optional.

## **Funding**

If the research reported in your paper was supported by a funding source, include the funder's name and grant information here.

## **References**

1. Provide citation information for all the previous publications referred to in your paper. Cite in APA style only those references that directly support your work.
2. Font: Calibri, size 12.
